Get the Most from Your Seeds and Plants

This book has been written for the amateur flower and vegetable grower. Through it we hope to help you have a garden this season that will be better than any you have ever had before. We have not attempted to catalogue all of the varieties of flowers and vegetables under cultivation, but have confined ourselves to those which have proved themselves, in the gardens of our customers, to be the most satisfactory. We want you to know that our interest in the success of your garden extends beyond the filling of your seed and plant order, and if there is any way in which we can be of help to you in the selection of varieties, the planting, or in the care and cultivation of flowers and vegetables, to feel absolutely free to call on us for advice.

People Admire Rich Green Lawns

When you buy grass seed for your lawn, be very particular about quality. Poor seed is very expensive. A large proportion of it is chaff and dirt, and very often it contains weed seeds that, once in your lawn, will make you endless trouble. Hart & Vick's Grass Seed Mixtures are of very high quality. They contain varieties of domestic and imported grass seeds in correct proportions and will make a lawn you will be proud of.

For a clover lawn you will find our Highland Park Mixture particularly good. If you wish a lawn without clover we recommend our Bent Lawn Grass Mixture. Directions for lawn-making are sent with each lot of seed.

Highland Park Grass Seed

MAKES THE FINEST LAWNS

This mixture has proved its worth by producing beautiful and permanent lawns for the city home, country estate, and public park. It is a careful blending of varieties of short, fine-leaved grasses and a correct percentage of pure white clover, and will make a thick, deep-rooted, velvety evergreen sod that will hold the moisture and remain fresh and green during the dry season in summer. This is our most popular Grass Seed Mixture. It has proved its quality not only on the smaller lawn of the city and suburban home, but has been and is being used with splendid results in many of the city parks, cemeteries, and large estates. Professional landscape gardeners specify that they will use Highland Park Grass Seed when submitting plans to particular patrons. The name "Highland Park" is a symbol of quality. Sow at rate of 1 pound to each 300 square feet of new lawn; reseeding 500 square feet of old lawn. Postpaid, $\frac{1}{2}$ lb. 25c; lb. 45c; 2 lbs. 85c; 3 lbs. \$1.20; 5 lbs. \$1.90; 10 lbs. \$3.50. Not prepaid, 25 lbs. \$7.50; 100 lbs. \$26; 1000 lbs. \$245.

Airport and Fairway Mixture

Airports and fairways require a strong matted turf that will stand hard use. The grasses we use in this mixture are especially suited for this purpose. They will make a thick, deep-rooted, closely knit sod of tough, fine-leaved grass in a remarkably short time. Not prepaid, 25 lbs. \$6.50; 100 lbs. \$24.50; 1000 lbs. \$225.

Shady Nook Mixture

On many lawns there are unsightly bare spots under trees and between adjoining houses where it is impossible to get the ordinary lawn grass to grow. This mixture is made up of short-growing, fine-leaved grasses that will give you an evergreen sod in the most densely shaded spots. Often the soil is sour and moss grows in such places, which should be treated with lime. Sow at rate of 1 pound to each 200 square feet of new lawn; reseeding 350 square feet of old lawn. Postpaid, $\frac{1}{2}$ lb. 25c; lb. 50c; 3 lbs. \$1.35; 5 lbs. \$2.15; 10 lbs. \$4. Not prepaid, 25 lbs. \$8.75; 100 lbs. \$30.

Terrace Grass Mixture

Banks and terraces need deep-rooting, very hardy grasses to hold them in place. In this special mixture we have combined varieties of very strong-rooted grasses that will not only quickly form a thick, matted sod that will keep the bank from washing out in heavy rains, but one that will remain fresh and green all season. We recommend sowing grass seed for terraces at the rate of 1 pound to each 200 square feet. Postpaid, $\frac{1}{2}$ lb. 25c; lb. 50c; 3 lbs. \$1.35; 5 lbs. \$2.15; 10 lbs. \$4. Not prepaid, 25 lbs. \$8.75; 100 lbs. \$30.

Rochester, N. Y., is noted all over the country for its unusually fine lawns. We point with no little pride to the fact, so well known throughout this city, that our grass seeds have played an important part in the making of these splendid grass-plots.

The Stadium of the new University of Rochester. Hart & Vick's Stadium Grass Seed Mixture was used on all of the athletic fields

Bent Grass Mixture

To meet the demand for a grass seed mixture that will make a lawn around the home like a putting-green on a golf-course, we have combined in this formula the seeds of grasses that not only produce the finest leaf-blades, but varieties that creep, mat together and make a soft, luxuriant, evergreen turf the entire season. When preparing the soil for this Grass Seed Mixture, we recommend the use of Bonemeal (100 pounds to every 500 square feet) well worked into the soil before the seed is sown. After the grass is up apply Sulphate of Ammonia (1 pound dissolved in 10 gallons of water to every 100 square feet). Sow seed at the rate of 1 pound to every 250 square feet. Postpaid, ½ lb. 40c; lb. 75c; 3 lbs. \$2.10; 5 lbs. \$3.35; 10 lbs. \$6.50. Not prepaid, 25 lbs. \$14.65; 100 lbs. \$57.50.

Sod-Lot Mixture

A mixture of low-growing grasses which forms a mat of roots quickly. This mixture is being used most successfully by parks, cemeteries, and landscape contractors requiring sod for transplanting. Not prepaid, 25 lbs. \$6; 100 lbs. \$21; 1000 lbs. \$195.

Stadium Mixture

Thoman-DeNeve, Inc., Landscape Contractors, have established a state-wide reputation for the building of superfine lawns, grass courts, and athletic fields. They used Stadium Mixture in the building of the athletic fields of the new University of Rochester and the results have been very satisfactory. This mixture is made to give the thick, springy turf so necessary to the well-being of the athletes. It was also used in the new Red Wing Baseball Park in Rochester, where the seed was sown in April and played on by the middle of May. Not prepaid, 25 lbs. \$11.50; 100 lbs. \$42.50; 1000 lbs. \$415.

Pure White Dutch Clover for Lawns

This is the Clover to sow on lawns. It is low-growing, forms a mat-like sod, and remains green all season. Particularly useful on sandy soils, especially where lawns are to be built at the lake or seashore. Mix 1 pound of seed with 2 quarts of sand or fine soil to insure an even distribution; will sow 100 square feet. Postpaid, ¼ lb. 20c; ½ lb. 35c; lb. 65c; 5 lbs. \$3; 10 lbs. \$5.50. Not prepaid, 25 lbs. \$12.50; 100 lbs. \$45.

Annual Blue Grass (*Poa annua*). A very dwarf-growing grass that spreads by reseeding itself. Many golf clubs are using this grass on their greens where it is giving good results. Postpaid, lb. 75c; 5 lbs. \$3.25; 10 lbs. \$6. Not prepaid, 100 lbs. \$52.50.

Kentucky Blue Grass (*Poa pratensis*). This is the favorite lawn grass in the North, and also the principal pasture grass on all rich soils. The leaves are narrow, flat, and vivid deep green. Plants are slightly creeping and very hardy. Kentucky Blue Grass is slow to germinate; for lawns we recommend combining it with other grasses. One pound will sow 200 square feet. Postpaid, lb. 35c; 5 lbs. \$1.45; 10 lbs. \$2.75. Not prepaid, 25 lbs. \$6.25; 100 lbs. \$24.

Colonial or Rhode Island Bent Grass (*Agrostis capillaris*). A very fine-leaved, low-growing, deep green grass whose roots and crowns mat together and form a turf of unequaled smoothness. It seems to bear constant use in the most remarkable way and is, therefore, the most popular grass for putting- and bowling-greens, croquet-grounds, tennis-courts, and specially fine lawns. One pound will sow 200 square feet. Lb. \$1.15; 5 lbs. \$5.25; 10 lbs. \$10; 100 lbs. \$90, prepaid.

Seaside Bent Grass (*Agrostis maritima*). Certified Coos County Strain. A strictly creeping grass. Ideal for putting-greens. Blends well with the turf of the standard vegetative strains, and is somewhat resistant to large brown patch. Lb. \$1.55; 5 lbs. \$7; 10 lbs. \$13.50; 100 lbs. \$125, prepaid.

South German Bent. A mixture of Velvet Bent, Colonial or Rhode Island Bent, and Carpet or Creeping Bent that produces a fine-textured turf of pleasing color. Useful for lawns and putting-greens. Lb. \$1.30; 5 lbs. \$6; 10 lbs. \$11.75; 100 lbs. \$110, prepaid.

Red-Top (*Agrostis palustris*). Quick-growing, fine-leaved, bright green, creeping grass popular for lawns and golf-courses. One pound will sow 200 square feet. Postpaid, lb. 25c; 5 lbs. \$1.15; 10 lbs. \$2. Not prepaid, 25 lbs. \$4; 100 lbs. \$15.

Fine-leaved Fescue (*Festuca tenuifolia*). A splendid grass for putting-greens, producing a soft, velvety, beautiful turf. The best grass for sowing in the spaces between flagstones in the garden path. Lb. 50c; 5 lbs. \$2.10; 10 lbs. \$4; 25 lbs. \$9.50; 100 lbs. \$37.50, prepaid.

Gardens That Are Well Planned Will Have

Hart & Vick's "Will-Bloom" Asters

For a number of years gardeners have found it increasingly difficult to grow good Asters. The plants might start and give evidence of thriving, but long before coming to bloom the foliage would droop, and in a few days the entire planting would be wiped out. The cause of the disease was found to be in the soil. Likewise, it was observed that out of each planting there were a few survivors who seemed to resist the attacks of the disease. Seed from these survivors was saved and replanted the next year in the same diseased field. Again some plants survived and again the seed was saved and planted. This method was continued until a strain of "Will-Bloom" or wilt-resistant Asters was developed. The whole process may be likened to vaccination against smallpox, or inoculation against typhoid, diphtheria, and similar diseases.

We have been fortunate in securing a reasonable quantity of this "Will-Bloom" Aster seed, and in 17 varieties as here listed. We feel quite sure that this strain of seed will again make Asters one of our most popular garden flowers. While the cost of producing "Will-Bloom" Aster seed is considerably more than the cost of ordinary seed, we have made our 1934 price

so reasonable that everyone may again have Asters in their garden. For further description you are invited to refer to pages 12 and 13 of this Catalog.

The Aster seed offered in our general collection (see pages 12 and 13) is saved from strong, healthy plants selected by an expert Aster grower. These varieties will gradually develop resistance to the Aster Wilt, and gardeners will undoubtedly secure satisfaction from this seed. However, at the present time the seed is not considered as definitely immune to the Aster disease.

Super-Giant Los Angeles Aster

There are three points about this new race of Asters that put Los Angeles in the very front rank: The color, which is a pure shell-pink; the size of the bloom—truly a giant, with long, interlacing petals; long stems that make it desirable for cutting and for garden use. Pkg. 25c.

Super-Giant Los Angeles Aster

Salmongold Aster

The flowers start to appear in early July and continue to late autumn. When first opening the bloom is pure salmon-yellow, changing to salmon-pink as the petals age—a globe of color $2\frac{3}{4}$ to $3\frac{1}{2}$ inches in diameter. They retain their freshness two weeks or more after cutting and can be shipped long distances. The stems are long and the plant carries 40 to 50 blooms at one time. Pkg. 20c.

New "Sensation" Aster

Of all red Asters this is the most startling in color. Sensation is a real ox-blood-red or rich garnet, a color that is most conspicuous. The plant is of the branching type and gives many flowers on long, strong stems. You can have this striking Aster as the seed is saved from our "Will-Bloom" strain. Pkg. 15c.

Aquilegia Columbine

Oxford Blue, Long-spurred. A beautiful clear blue variety. Blooms are immense, with long graceful spurs. Pkg. 25c.

Aquilegia alpina. A little gem for rock-gardens. The dark blue flowers appear in April and continue well into the summer. Plants are about a foot high. Pkg. 15c; 2 pkgs. 25c.

These Flowers in Abundance This Summer

Sunshine Calendula

This lovely new Calendula is shown in color on the front cover of this Catalog. Turn to it, and look at it again. Did you ever see a Calendula that could compare with it? The color reminds you of the golden buttercups from the fields, with the added charm of loosely arranged petals. Sunshine is a fine flower for cutting, and is at its best when shown with delphiniums or other blue flowers. The flowers are considerably larger than those of the ordinary Calendula and are carried on long stiff stems. Pkg. 25c.

Orange Radio Calendula

This was the first of the new Radio Calendulas. The petals are quilled—not flat—and are of a pronounced rich orange color. The flowers of this variety, and also of Golden Beam, are considerably larger than the general type of Calendula. The Radio Calendulas are a distinction to the family. Pkg. 15c; 2 pkgs. 25c.

Golden Beam Radio Calendula

The latest of the Radio Calendulas. The color is bright golden yellow, and the flower carries the quilled petals of the Radio type. Pkg. 25c.

Siberian Wallflower

Cheiranthus Allionii

Flaming orange flowers that glisten like gold in the sun. The plants are 12 to 15 inches tall, and bloom freely in May and June. Extremely popular. Pkg. 10c.

Siberian Wallflowers (*Cheiranthus Allionii*)

Calendula, Radio

The Roggli Pansy seed produced the most beautiful Pansies I have ever raised in my garden.—A. S. KLOSS, Brunswick, Ga.

Your Roggli Swiss Giant Pansies gave wonderful flowers last year.—MRS. A. E. GREEN, Hilliards, Pa.

New Foxglove

Golden Gleam

The New Double Nasturtium

Gardeners have long wanted a pure golden yellow double Nasturtium. Here it is. The introducer was extremely careful in selecting plants for stock-seeding, with the result that practically every flower came double when Golden Gleam was introduced last year—and the same care has been exercised in raising the seed for 1934. Our seed comes direct from the introducer and is therefore to be depended on without question. The flowers are nearly 3 inches across and carried on stems at least 6 inches long. (Pictured in color on third cover.) Pkg. 15c; 1/2 oz. 30c; oz. 50c.

New Foxglove

While the flowers are of the usual thimble-shape, the color is distinctly unusual—a beautiful salmon- or apricot-pink. It is a distinct addition to the Digitalis family. Pkg. 25c.

Dianthus • Pinks

Allwoodii alpinus. July to August. Bears large flowers in shades of rose and pink. Grows 4 to 6 inches high and is excellent for the rock-garden. Pkg. 35c.

Sweet Wivelsfield. Hardy biennial, treated as an annual. Delicately fringed, sweet-william-like flowers in various colors are produced from July to frost. Pkg. 15c; 2 pkgs. 25c.

Unwin's Dwarf Dahlias

These Dwarf Dahlias grow readily from seed, making plants about 2 feet high and producing great quantities of semi-double flowers. Extremely effective in a massed planting and valuable for cutting. (Illustrated in color on third cover page.) Pkg. 25c.

Dianthus, Sweet Wivelsfield

Flowers from Hart & Vick's Good Seeds With

Monarch French Marigolds

Pink Gem Petunia

First of a charming new race of miniature Petunias. The dwarf, compact plant grows only 5 or 6 inches high, and is literally smothered with flowers until frost cuts the plants. The blooms are single and in color a rich deep pink. For a charming effect, Pink Gem should be grown with the dwarf blue ageratum. Pink Gem is almost indispensable for window- and porch-boxes, for rock-gardens, for masses of color—in fact, any place where a free-blooming, dwarf annual is required. Pkg. 25c.

The Tagetes and Virginia Stocks were lovely. They were a mass of bloom all summer.—J. KERRIDGE, Albion, N. Y.

Annual Canterbury Bells

Gaillardia, Burgundy

Gaillardias may be counted among the first half-dozen conspicuous flowers of the hardy garden. Burgundy now brings added popularity to the family. The flowers are a departure in that they are rich wine-red, rather than the yellow and reds of the common Gaillardias. Because of the color they have become one of the favorites of the hardy garden. Seed sown early in the spring should produce strong plants that will bloom in midsummer and continue flowering until late autumn. Pkg. 15c.

Success with Asters

With delight I write you to tell of the success I had with the Aster seeds purchased from you in the spring. The blooms were wonderful; I can hardly find words to tell you how much I enjoyed them. They were very large, despite the severe storms and rain during the blooming season. I have cut bunches and bunches and have given many bouquets to friends in hospitals and other places. All these friends marvel at the blooms and tell me the ones sent from the florist were not as beautiful.—MRS. C. R. BATDORF, Fredericksburg, Pa.

New Marigold, Guinea Gold

In twelve months Guinea Gold has become the most popular of all Marigolds. Words of praise come from Europe, from South America, from Canada, and from all the states of the Union. The flowers are double and semi-double, no single flowers being produced. They are unusually large, many of them measuring $2\frac{1}{2}$ inches across, and borne in such profusion that the plants look like huge golden bouquets. The plants grow to a height of 2 to $2\frac{1}{2}$ feet; while they are strong and sturdy, a little support may be needed by the larger specimens. (Pictured in color on second cover.) Pkg. 15c; $\frac{1}{8}$ oz. 45c; $\frac{1}{4}$ oz. 75c; $\frac{1}{2}$ oz. \$1.25.

French Marigold, Monarch

Dwarf, compact plants with very large, tight, double flowers in a wide color-range which includes combinations of orange, bronze, yellow, and mahogany. Many of the flowers are striped or spotted with two different colors. Plants grow well, and the many blooms furnish a carpet of color that is most pleasing. It is an addition to the Marigold family that will be interesting to all growers of annuals. Pkg. 15c; $\frac{1}{8}$ oz. 30c; $\frac{1}{4}$ oz. 50c; $\frac{1}{2}$ oz. 85c.

Annual Canterbury Bell

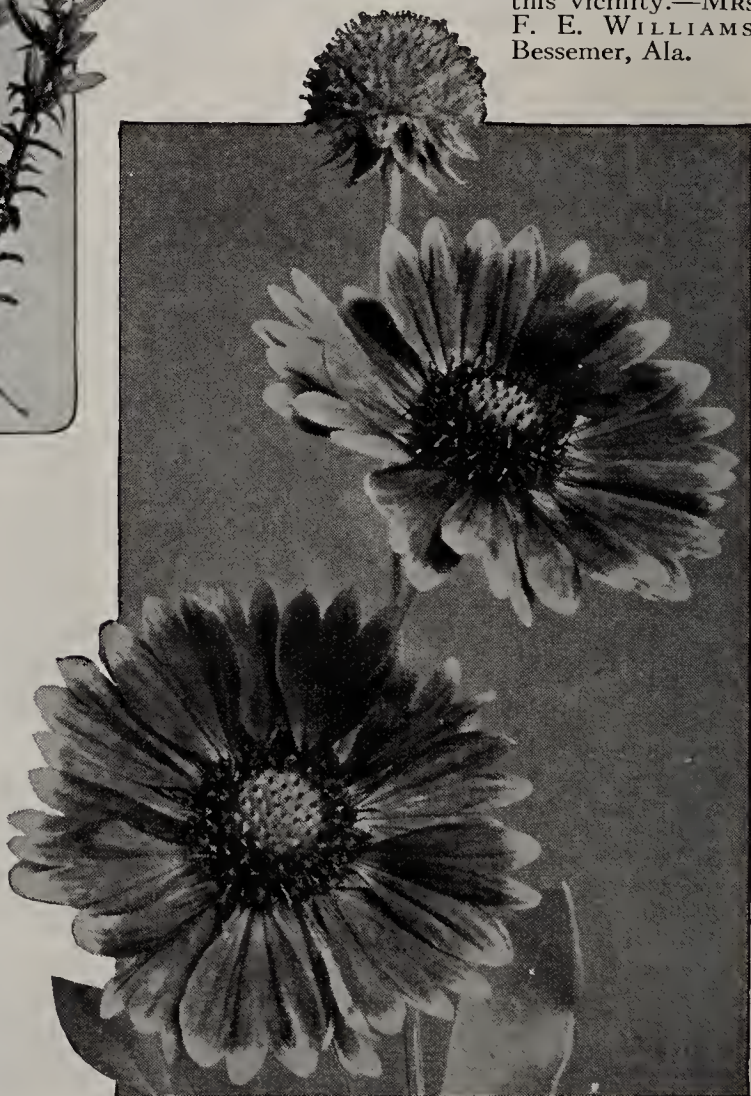

This type of Annual Canterbury Bell is bound to increase the popularity of this flower for our home-gardens. The colors include pink, rose, white, blue, and light blue. February is none too early to sow the seed, and sowings can be made to mid-August, thus furnishing flowers until late fall. The seed is offered in mixture only. Pkg. 20c.

Comments on Sweet Peas

For the past five years we have purchased and planted your Sweet Pea seed and have had the finest and earliest Sweet Peas in the neighborhood.—C. E. KRETLOW, Helena, Mont.

I have found your early-flowering Sweet Peas the best I have ever planted.—MRS. C. E. KREITZER, Farmersville, Ohio.

My Sweet Peas were the prettiest and healthiest looking, and bloomed longer than any others in this vicinity.—MRS. F. E. WILLIAMS, Bessemer, Ala.

Fill Your Gardens with Color and Fragrance

Hollyhock Delphinium

Known generally as the "Wrexham" Delphiniums, as they were originated by Mr. Watkin Samuel, of Wrexham, England. The flower-stems are unusually long, frequently rising to 8 feet, with the flowers extending down the stem $2\frac{1}{2}$ to 3 feet. Colors range from soft blues and pale lavenders to the darkest blues imaginable, with the "bee" or center in contrasting colors. All of the seed we offer is European-grown, and has been saved from the best plants and most pronounced colors. Pkg. 45c.

New Annual Delphinium

Cambridge Blue

Flowers of rich, clear blue, carried on stems from 2 to 3 feet high, thus making this annual valuable for cutting. The color is more brilliant than that of many of the perennial group, and in many gardens can well be substituted for the perennials. Pkg. 25c.

Annual Larkspur Blue Bell

In this new comer of the Giant Imperial type we have the long-desired deep sky-blue without the darker lilac tone. It is best described as "medium blue." The spikes are very long, with a score or more large flowers, thus making it valuable for cutting. Pkg. 25c.

Hart & Vick Seeds Have Been Used Exclusively

Imperator Hollyhock

Giant, double flowers 6 inches or more in diameter. An extra-fine variety, the colors including cerise and salmon, pink and yellow, rose and yellow, with a number of other lovely combinations. The tall spikes of bloom make an effective background in the border, or when seen in large groups. Pkg. 25c; 2 pkgs. 40c.

Blue Perennial Poppy

Meconopsis Baileyi

Because of its newness this Oriental perennial novelty deserves a place in every garden. It has already received an Award of Merit from the Royal Horticultural Society of England. The flowers are sky-blue, with a center of golden yellow anthers, and borne at the top of stems 2 to 3 feet tall. If possible, the seed should be placed in a refrigerator or ice-chest and become chilled or frozen; in this condition it should be sown in shallow pots or boxes and put under glass in a coldframe or greenhouse. When plants are large enough to handle, transfer to small pots and later on transplant to the garden in moist, well-drained soil, partially shaded. Pkg. 35c; 2 pkgs. 60c.

Best Zinnias Ever

I have raised Zinnias for many years but these are the best I have ever had. Form, size, color, and abundance of bloom were all that could be desired. None of the colors were sickly or indifferent. I call them perfect.—E. R. INMAN, Franklin, Pa.

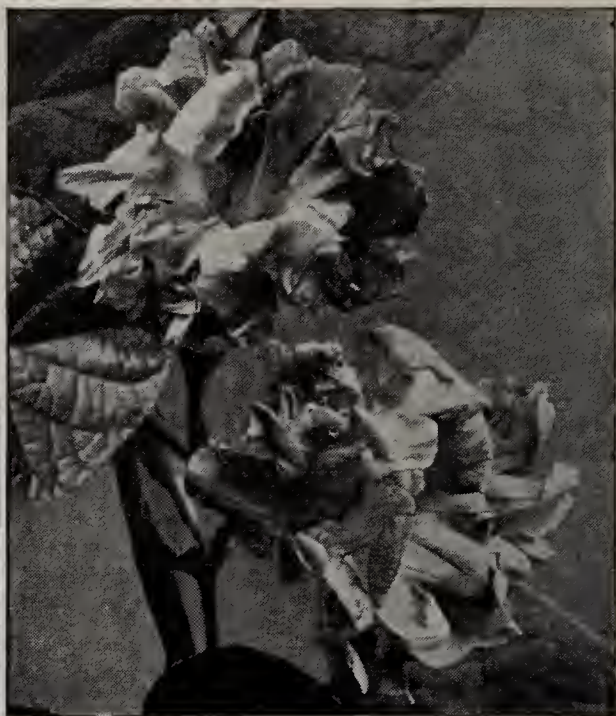

Blue Perennial Poppy

Imperator Hollyhock

Wild-Garden Flower Seeds

A mixture of the easiest growing annual flowers. The mixture can be sown broadcast and the plants will produce a brilliant effect with practically no care. Many of the flowers in the mixture are natives of the Far West; others are annuals that our grandmothers grew; all are interesting and many are little known. The mixture is especially adapted for borders, sowing in fence-corners or along the fence, and in any place that needs brightening. Large pkg. 10c; oz. 25c; 1/4 lb. 75c; lb. \$2.50.

New Double Moonflower, Rose Marie

New Double Moonflower Rose Marie

One of the newest Moonflowers, carrying deep rose, double or semi-double flowers, which are much larger than the ordinary type. Vines are early bloomers and strong and rapid growers, quickly covering trellis or frame. A splendid companion for Heavenly Blue described on page 25. Pkg. 15c.

Linum • Flax

Golden Yellow (*Linum flavum*). A dwarf plant, seldom growing more than 12 inches tall, and covered with golden yellow flowers from June to September. Excellent perennial for the rock-garden because of hardiness and long season of bloom. Pkg. 20c.

Mina Lobata Flag of Spain

An annual climber, well suited to covering trellises or porches, as the season's growth is 15 to 20 feet. The flowers are about an inch long, in clusters of a dozen or more, blood-red in color, changing to orange, and borne freely all summer. Pkg. 10c.

New Giant Verbenas

African Daisy

Venidium fastuosum

This is a new flower from South Africa, and because of its form—not its color—is called African Daisy. The 2- to 3-foot plants carry numerous, large, orange, daisy-like flowers marked with a purple-black zone at base of petals. Makes a most striking effect in the border. Seed should be sown in a sunny place, in warm soil. The plants require plenty of sunshine and not too much water. Pkg. 15c.

Venidium fastuosum

New Giant Verbenas

A new strain of Verbena originating in America and far superior to the older types of this plant. The flower trusses are truly immense, while the individual blooms will measure an inch or more in diameter. These great trusses are produced freely on strong, compact plants. Something like a dozen varieties and colors have thus far been offered, but we believe that the six here named are the best of the introductions, and we recommend them highly to our friends and customers.

Etna. Geranium-red; yellow eye.
Lucifer. Brilliant scarlet self-color.
White Giant. Pure snow-white.

Luminosa. Flame-pink and salmon.
Royale. Royal blue, with creamy yellow eye.

New Giant Mixed. Includes all the above colors. Pkg. 20c; 1/8 oz. 45c.

Lilliput or Pompon Zinnias

These plants form handsome little bushes a foot high that are covered with small, double flowers of all colors from midsummer until late fall. They make very handsome beds and showy borders. This type of Zinnias is popular as a cut-flower; we recommend that you give it space in your garden this season. (See color picture on second cover.)

Golden Gem. Golden yellow, very double flowers.
Scarlet Gem. Bright scarlet flowers on stout stems.
White Gem. Dainty, pure white-petaled flowers.

Salmon-Rose. A popular color.

Seeds of Annual and Perennial Flowers

Our list of Flower Seeds does not cover every variety, but it does describe the best kinds for garden planting. We believe that a carefully selected list like this is what the amateur gardener wants. Our seed is the best that can be grown, carefully tested for quality, and with ordinary care will give splendid results. It is of the same high quality we sell the particular florists for greenhouse and outside planting. Annuals are those kinds that you must plant each season. Perennials are hardy and last for years.

Antirrhinum or Snapdragon

These pretty, half-hardy perennials, that bloom from July until frost, belong to the aristocrats of the garden. Appearing, as they do, in the most pleasing shades, with the pretty flowers completely encircling the stout stems to fully 12 to 18 inches at the top, they are most useful for bedding or as cut-flowers. Seed sown outdoors in early May will make plants that bloom from early in July until frost. For earlier flowering, start seed indoors in March and transplant outside when weather is favorable.

Wrexham Hollyhock-flowered Delphinium

Shown in natural color on the second cover

The remarkable new Delphiniums, originated by Mr. Watkin Samuel, Wrexham, England, are called Hollyhock Delphiniums on account of their large spikes of unusually large flowers and very tall stems (7 to 8 feet). The colors range from pale lavender to indigo-blue, with centers or "bees" of contrasting colors. We offer European-grown seed. Pkg. 45c; $\frac{1}{8}$ oz. 95c; $\frac{1}{4}$ oz. \$1.75.

How to Grow Delphinium from Seed. Always insist on fresh seed. Sow in a well-prepared seed-bed, covering with $\frac{1}{8}$ inch of fine soil, firmed down. After sowing, cover the seed-bed with mulch, new lawn-clippings, peat moss, or even newspapers if kept wet. In 12 days remove mulch gradually. When plants have three leaves, move and space 6 inches apart. The following spring transplant in groups into your garden, allowing 1 foot between the plants. Mulch, after the ground is frozen, for protection. Some of the most expert professional private gardeners chill or freeze their Delphinium seed in the refrigerator or ice-chest for 24 hours and sow it while it is still cold.

They succeed best in a light soil, with full exposure to the sun. A vase or bowl of any of the rich yellow sorts in combination with a few blue larkspurs or cornflowers is very striking.

Hart & Vick's Sweet Peas

Sow seed as soon as the ground can be worked in the spring, for Sweet Peas, to be a success, must have made sufficient root-growth before warm weather comes to have carried the roots deep into the ground where they will be moist and cool at all times. Sweet Peas must have deeply spaded, well-worked soil for successful growth, and they must be frequently and thoroughly watered—never be allowed to dry out. We suggest mulching around the plant with peat moss to hold the moisture. Dig a trench about a foot wide and deep, and fill in with 6 inches of well-rotted manure. If no manure is available, spread thickly with bonemeal or sheep-manure. Replace soil in the trench to within 4 inches of the top. Plant the seeds in a zigzag row, 2 to 3 inches apart, covering with 1 inch of soil. Thin plants to stand 6 inches apart when 4 inches high. When cultivating, gradually fill trench to the top with soil. To support the vines, use branches, chicken-wire, or Sweet Pea fencing. Any support provided should be at least 5 feet high and the plants trained to it when they are up 8 inches from the ground.

New Snowdrift Cauliflower

New Snowdrift Cauliflower

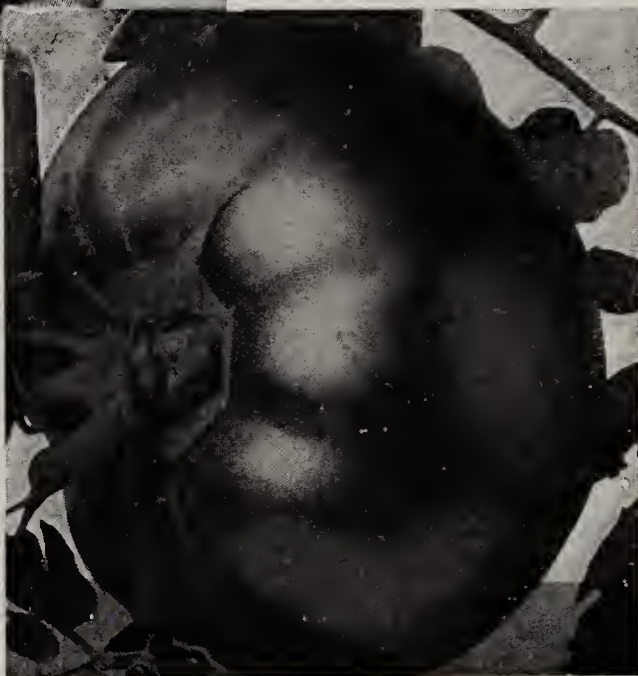

An improved strain of the popular Snowball Cauliflower. This newcomer is ready for use several days before any other sort, a point of importance to market-growers; the second point is that under ordinary cultivation the head will be larger than other kinds, and when given expert care the size is extra large; the third point is that the heads of Snowdrift are of fine texture and fully as deep as the largest heads of other kinds. We highly recommend this new introduction to home-gardeners and market-growers. Pkg. 25c; 1/4 oz. \$1, postpaid.

Purple Cauliflower

Attracts attention on account of the color, which is a light purple. Many people believe the flavor is superior to any other variety; in fact, when cooked the flavor is similar to green broccoli, but not quite so strong. In form the heads are similar to other Cauliflowers, are 5 to 6 inches across, very solid, and do not need blanching. The seed germinates quickly, growing into strong plants, free from disease. Pkg. 15c; 1/4 oz. 50c; 1/2 oz. 85c, postpaid.

HART & VICK'S Geneva John Baer Tomato

This new "Geneva" strain of John Baer Tomato is a long step ahead of the older sort. It is the result of selection and reselection during several seasons from seed-fields of the original John Baer. The "Geneva" strain produces larger fruits which are of uniform size and shape. Flesh is fine-grained, thick, solid, tender, and with a fair amount of juice. The plants are thrifty growers and bear fully as freely as the older variety. We feel sure you will like the "Geneva" strain. Pkg. 20c; 1/2 oz. 45c, postpaid.

Mary Washington Asparagus

Asparagus Roots

A leaflet on the "Planting and Care of Asparagus" sent with every order

The popularity of Asparagus in the home-garden is growing rapidly, as people learn how easily it may be raised, and how much better the flavor is when cooked immediately after cutting. Asparagus begins to lose flavor 20 minutes after being taken from the ground. A small bed 12 feet wide and 25 feet long will hold 100 plants and yield sufficient Asparagus for the family of ordinary size.

Mary Washington. This new variety is the very finest for the home-garden or to grow for market. At last we have not only a rustproof variety but an Asparagus that is very fast-growing, exceedingly tender, of excellent flavor, and that produces heavy stalks 1 to 2 inches in diameter. It is larger and earlier than Pedigreed Washington, and the stalks are slightly oval in form.

SELECTED ROOTS. Doz. 45c; 50 for \$1.25; 100 for \$2; 1000 for \$13.50. Add 5c for each 25 roots if to be sent by Parcel Post.

Detroit Dark Red Beets

Crosby's Egyptian Beets

Large-ribbed Silver Swiss Chard

Hart & Vick's Table Beets

One package of seed will sow 15 feet of row; 1 ounce, 50 feet; 9 to 10 pounds, an acre

The best results are obtained on a deep, rich sandy loam. Sow seed 1 inch deep, in drills 16 inches apart, as early as possible. If wanted very early, sow Detroit Dark Red and Crosby's Egyptian in hotbeds and transplant to open ground. Thin to stand 3 to 4 inches apart. Cultivate cleanly and thoroughly. For succession, sow at intervals until middle of July.

Crosby's Egyptian, Hart & Vick Strain. Our special strain of this popular variety is better in many respects than the old one. Sow 8 pounds to the acre in May or June, in drills 2 feet apart, and thin to 10 inches in the row.

Danish Ballhead Cabbage

Midseason and Late Cabbage, continued

DANISH BALLHEAD. Our stock is fresh from its originator in Denmark. There is no finer strain of Danish Ballhead. It is sure-heading, solid, of good quality, long-keeping, making it desirable for distant markets and for late spring use. A hardy, vigorous sort that resists cold and stands dry weather well. Heads are round, exceptionally solid, with short stems. Cabbage grown from our special strain of this variety runs larger and more uniform than from most other sorts. Pkg. 10c; oz. 35c; ¼ lb. 95c; lb. \$2.85.

Penn State Ballhead. This new variety is the result of 10 years of breeding by the Pennsylvania State College. Chinese or Celery Cabbage

Cut into quarters and boiled with meat, or alone, its mild, rich flavor and tenderness put it far ahead of Cabbage. Boiled, fried, baked with cheese—any way you have a mind to cook or serve Chinese Cabbage you will find it delicious. NANTES CORELESS. A particularly fine Carrot for table use, as it is not only very sweet and tender and of mild flavor, but is unusually free from any core. It is 7 to 8 inches in length, shaped like a cylinder, blunt-pointed, and very smooth. Its rich orange-red color makes it very attractive. We recommend Nantes for your garden. Pkg. 10c; oz. 20c; $\frac{1}{4}$ lb. 55c; lb. \$1.85.

CHANTENAY, H. & V. SPECIAL STRAIN. A medium-early sort, 6 to 7 inches long, smooth, thick, slightly tapered. One of the best in quality for the home- and market-garden. Charles H. Ward, of Sodus, N. Cauliflower

One package of seed will produce 200 plants; 1 ounce, about 3000 plants

For early Cauliflower, sow seed under glass in January or February and transplant to coldframes, 2 to 3 inches apart each way. Set in open ground early in the spring in rich, warm, moist soil. Water freely in dry weather, especially when plants are heading. For main crop, sow seed in June; set out your plants the latter part of July. After heads have begun to form, draw leaves over and tie to protect from the sun and to keep them white. Cut while heads are compact and firm. Protect from insects by dusting or spraying with tobacco dust or kerosene emulsion.

SNOWDRIFT. A new, early variety which makes a larger head than Snowball. The head has unusual depth, is of fine texture, and blanches very easily. Pkg. 25c; $\frac{1}{4}$ oz. \$1.

PIONEER. During the season of 1933 this variety attracted a great deal of attention in our fields, and proved to be one of the best early varieties we have ever seen. It is midway between Snowdrift and early Snowball, therefore we suggest planting a small plot of both of these new introductions. Pkg. 20c; $\frac{1}{8}$ oz. 60c; $\frac{1}{4}$ oz. \$1.

Purple. Distinct from other Cauliflower in that the heads have a pronounced purple color. It grows readily, making strong, disease-free plants, and the heads do not require blanching. The taste is similar to green broccoli. Pkg. 15c; $\frac{1}{4}$ oz. 50c; $\frac{1}{2}$ oz. 85c.

EARLY SNOWBALL. An extremely early, dwarf variety, most desirable for the home-garden. Admirably adapted for forcing or wintering over for early crop; also one of the best for late summer or fall crop. Pkg. 15c; $\frac{1}{4}$ oz. 75c; $\frac{1}{2}$ oz. \$1.25.

Extra-Early Dwarf Erfurt. Medium-early. Gives excellent results in home- and market-gardens. Similar in most respects to Early Snowball. Pkg. 10c; $\frac{1}{4}$ oz. 65c; $\frac{1}{2}$ oz. \$1.10.

Dry Weather or Danish Giant. This fine variety is especially adapted for growing in sections subjected to long, dry seasons and will produce large, solid, pure white heads of delicious flavor in spite of lack of moisture. Pkg. 15c; $\frac{1}{4}$ oz. 75c; $\frac{1}{2}$ oz. \$1.25.

One ounce of seed will sow 150 feet of row

Early Snowball Cauliflower

Celery, Hart & Vick's Home-Garden Strains

One package of seed will produce about 600 plants; 1 ounce, about 9000 plants

Celery seed is very slow in germinating and should be sown in March in flats under glass and kept moist. When plants are 2 inches high, thin out and transplant to stand 3 inches apart each way. When 5 inches high, set out, 6 inches apart, in trenches 6 inches deep. Cut off outer leaves and press soil firmly about roots. Cultivate thoroughly. When full grown, blanch by mounding gradually with earth or by pressing stems together by board on both sides of row. For winter storage, take up the plants with roots and place upright on wet soil in a dark cellar or root-house, packing closely. Those who grow Celery for market will be interested to know that we have a proved strain of the old original Dwarf Golden Self-blanching Celery.

HART & VICK'S GOLDEN WONDER. In our opinion the finest early Celery, both for the home-garden and for market, that has ever been introduced. It is tall-growing, with more edible stem than any other kind. The plants are heavy and compact, full-hearted, and very upright-growing. Stems are broad, thick, brittle, and free from strings. The flavor and quality is unusually good. Pkg. 15c; $\frac{1}{8}$ oz. 25c; $\frac{1}{4}$ oz. 40c; oz. \$1.25.

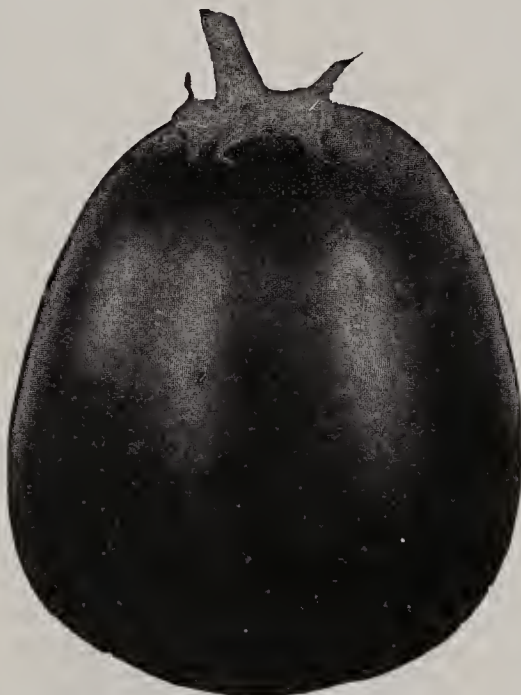

Golden Wonder Celery

GOLDEN SELF-BLANCHING CELERY.

This is the Celery that is generally grown for market and is a splendid kind for your own home-garden. It is early, dwarf-growing, and easily blanched. The stalks are thick, solid, crisp, and brittle. The quality is excellent, tender, and free from stringiness. Grow this kind for fall and early winter use. Pkg. 15c; $\frac{1}{2}$ oz. 50c; oz. 85c.

EMPEROR. A late variety especially adapted to winter use. The stalks are white, thick, large, and solid, with a pale yellow heart, and will average about 18 inches high. Pkg. 15c; $\frac{1}{2}$ oz. 50c; oz. 85c.

GOLDEN PLUME. A new and very fine early Celery for both the home-garden and for market. The stalks are large and heavy with a full, golden yellow heart. An easy-blanching kind, always crisp and brittle, and a splendid keeper. Pkg. 15c; $\frac{1}{2}$ oz. 60c; oz. \$1.

Improved New York Spineless Eggplant

Easy-blanching or Sanford Superb. A Celery resembling Golden Self-blanching, but the leaves are green and stalks white instead of yellow. Stalks of same form and heavy heart as the Golden and blanch very quickly and easily. A very fine Celery for fall and winter use. It keeps well, has fine quality, solid and stringless. Pkg. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c.

WINTER QUEEN. A splendid winter-keeping Celery with a very large heart. Compact in growth, crisp, and has a delicious nutty flavor. Late Celeries require a different treatment from the self-blanching sorts. After a slight banking up in the open ground, the plants are put away in deep trenches to blanch. Kept this way in contact with earth, they acquire greater tenderness and more flavor. Pkg. 10c; $\frac{1}{2}$ oz. 25c; oz. 40c.

GIANT PASCAL. The standard winter Celery for home- and market-gardens. Stalks are extra large, quite broad, and solid. The color is pale green, but the stalk blanches readily to white with a creamy white heart. For late winter use no variety approaches Giant Pascal. Pkg. 10c; $\frac{1}{2}$ oz. 20c; oz. 35c.

Columbia. An early winter, green Celery that keeps a long time. Pkg. 10c; $\frac{1}{2}$ oz. 30c; oz. 45c.

Celeriac (Turnip-rooted Celery)

Celeriac Turnip-rooted Celery

This delicious vegetable, although used extensively throughout Europe, is but little known in this country. If you do not grow it you are missing something really good. It resembles Celery but has an enlarged, turnip-like root in place of stalks that will keep for almost a year when packed in sand in a cool place. Cultivate same as Celery, except no hilling is necessary. It is cooked in various ways, boiled and creamed, put in stews or sliced very thin and put in boiling water, then served cold in salads. Every gardener should grow it.

Large Smooth Prague. Pkg. 10c; oz. 30c; $\frac{1}{4}$ lb. 85c; lb. \$2.75.

Eggplants

One package of seed will produce 100 plants; 1 ounce, 1500 plants

Start seed under glass early in March and bring plants to a good size as rapidly as possible. Transplant, when 3 inches high, to 4 inches apart. As soon as weather is warm, set out in open ground, about 3 inches apart each way. Spray for beetle with arsenate of lead or Pyrox.

Black Beauty. An extra-early, strong-growing, productive variety. The fruits are large, purple-black, entirely spineless, and of high quality. Holds its color a long time and is a desirable market variety. Pkg. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c; $\frac{1}{4}$ lb. \$1.45.

Improved New York Spineless. A very productive variety, popular in both home- and market-gardens. Plants produce 6 to 8 large, spineless, dark purple, oval fruits of high quality. Pkg. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c; $\frac{1}{4}$ lb. \$1.45.

Our Guarantee of Satisfaction

We guarantee our seeds to give satisfaction or we will return to you the money you paid us for them. Owing to many conditions of soil and climate over which we have no control, we cannot assume any responsibility for loss of a crop, and it must be distinctly understood that we will not consider any claim for loss exceeding the amount paid for the seed.

Early Fortune Cucumber

Cucumbers for the Home-Garden

One package of seed will sow 15 hills; 1 ounce, 50 hills

Cucumbers should be raised in every home-garden. They can be grown to perfection with ordinary care. Plant seed when danger from frost is over, an inch deep in hills 4 to 6 feet apart each way, dropping 8 to 10 seeds in a hill. When second set of leaves has formed, thin to 4 plants to a hill. Cultivate thoroughly until runners make this impossible. If plants are attacked by beetles, spray with Bordeaux or arsenate of lead. Always wash fruits thoroughly before eating when these sprays are used.

EARLY FORTUNE. The crisp, very tender flesh, with its few seeds, and the long, slender shape and dark green color of this Cucumber make it a very fine variety for home-garden growing. We recommend Early Fortune to you. Pkg. 10c; oz. 20c; $\frac{1}{4}$ lb. 45c; lb. \$1.35.

NATIONAL PICKLING. Anyone who likes the small sweet or sour pickles will want to grow a great patch of this new Cucumber. Soil should be made as rich as possible by fertilizing and thorough preparation. For main garden crop, sow seed outdoors in a warm spot in the garden, as early in spring as possible, in rows 18 inches apart. The Garden Huckleberry

These "Pie Berries" grow big, strong plants that bear quantities of fruit the same season that you sow the seed. Some call them "Sun Berries," others "Wonder Berries." Down in Wayne County, N. Y., where we saw them first, they call them Seed Huckleberries, first because they grow and bear from seed the first year and Huckleberries for the reason that pies made from them rival the most delicious Huckleberry pies that you ever tasted. These "Pie Berries" are not a freak; they are just a mighty good garden fruit, bearing freely and needing little care or space. Pkg. (50 seeds) 15c; 2 pkgs. 25c.

Onward Peas

Good Garden Peas

The very early, smooth Peas can be sown while some frost is in the ground. They bear very early, but are not as sweet as the wrinkled kinds. Sow the wrinkled varieties when the ground is warm. Plant Peas in trenches that are 3 to 4 inches deep and 2 feet apart, covering seed with an inch of soil. Tall varieties should be kept from trailing on the ground by supports. This is a little more trouble than in growing the dwarf kinds, but you will get more Peas from them. Pinch back the tips of the runners of the tall kinds; it makes a heavier crop.

Hart & Vick's Radishes

One package of seed will sow 15 feet of row; 1 ounce, 60 feet

This is another vegetable that loses about half its flavor if not eaten within a very short time after it is taken from the ground. Radishes wilt like flowers and other vegetables, and lose their fresh crispness and juicy, delicate flavor. You cannot know how really good Radishes are if you haven't gone out in the garden in the early morning and pulled a few for your breakfast.

For forcing, sow in hotbed or under glass in rich, sandy loam. Scatter 50 to 100 seeds to the foot and cover with $\frac{1}{4}$ inch of soil sifted on. Sow in garden, as early as possible, in rows about 1 foot apart and thin to prevent crowding. A good dressing of nitrate of soda will greatly help their growth and make them tender and crisp. Successive sowings every week or 10 days will keep your table well supplied the entire season.

VICK'S EARLY SCARLET GLOBE. Our Special Strain of this Radish for the home- and market-garden is very fine. The seed is selected from bulbs of the true Scarlet Globe type. It is a strain we can recommend to both market- and home-garden growers. Vick's Scarlet Globe is the best all-round Radish on the market. Tops are very small. Bulbs of our Special Strain are uniformly true globe-shaped, rich scarlet; flesh pure white, crisp, tender, juicy and mild. Pkg. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. 85c.

Hart & Vick's Delphiniums

These are the most popular of all the hardy plants for the garden. The tall spikes of lovely blue flowers, standing erect above the dark green foliage, make a wonderful sight. They begin to bloom in June, and by cutting the plants to the ground as the crops of flowers fade, a second and third lot of bloom may be had. Flower-stalks are very brittle and should be staked to keep them from being blown over by the wind. Fertilize well around the roots with bonemeal, and in the late fall sift coal-ashes over the crowns to protect them from grubs. Plant several clumps of these in your garden.

The chief distinguishing features of the "Hollyhock" Delphinium are the extraordinary length and spire-like shape of the spikes, the marvelous range of colors—from a delicate *Belladonna* blue to the deepest blues and purples—and the unusual length of the flowering period. Plants 35c each; 90c for 3; \$3.50 for 12.

H. & V. Exhibition Hybrids, Mixed. As fine a lot of hybrid Delphiniums as can be found. These plants were grown from seed and saved from the most perfect flowers in a Delphinium collection famous throughout this part of the country. Hardy Garden Lilies

All hardy borders should have some of the various kinds of Lilies scattered through them. Here they do their best, as they get the benefit of the shade of the near-by plants which is so necessary for successful growing. Plant these Lilies in the early spring, as soon as the frost is out of the ground, and allow a foot of space between them. Follow directions as to the depth each kind should be planted.

Auratum. This Lily is sometimes called the Gold-banded Lily of Japan. It is one of the finest of all Lilies, with its large, graceful, fragrant flowers of delicate ivory-white, thickly spotted with chocolate-crimson and striped through the center with golden yellow. Grows 3 to 5 feet high and blooms from July to September. Stem-rooting; plant 10 inches deep. Extra-large, strong bulbs, 35c each; 90c for 3; \$3.50 for 12; \$27.50 per 100.

Colchicum Szovitzianum. Bears, in June, handsome spikes of 20 to 30 large, turban-shaped flowers of clear citron-yellow, spotted with black. Grows 5 feet high and thrives best in a sandy loam. Plant 5 inches deep. 60c each; \$1.65 for 3; \$6.45 for 12; \$50 per 100.

Elegans atrosanguineum. A very hardy, low-growing Lily, particularly adapted to the rock-garden and for growing in front of taller perennials. The large, erect, dark red flowers, with deep crimson centers, are borne profusely on 1-foot stems in June and July. Plant 6 inches deep. 30c each; 85c for 3; \$3.25 for 12; \$25 per 100.

Henryi. This very beautiful Lily comes from China. It is a strong, hardy, healthy grower and one of the finest for the garden. The stalks, 4 to 5 feet high, carry 6 to 8 blossoms each of a rich apricot-yellow, lightly spotted with brown. Stem-rooting; plant 10 inches deep. Giant bulbs, 45c each; \$1.20 for 3; \$4.50 for 12; \$35 per 100.

Pardalinum (Leopard Lily). A stately Lily, growing 6 feet high and bearing, in July, 15 to 20 showy flowers of bright scarlet, shading to yellow and freely spotted with brown. Base-rooting; plant 5 inches deep. Bulbs 40c each; \$1.10 for 3; \$3.90 for 12; \$30 per 100.

Regale. A hardy Lily with waxy white petals striped with pink and a lemon-yellow throat. The trumpet is about 6 inches long, and when the flower is fully developed it is about 7 inches across. The bloom, when cut or if left on the plant, possesses wonderful keeping qualities. It has a delightful perfume, somewhat resembling the variety *L. auratum*, and yet somewhat like a gardenia. Stem-rooting; plant 8 inches deep. Strong bulbs, that will flower the first season, 40c each; \$1.10 for 3; \$3.90 for 12; \$30 per 100.

Speciosum magnificum. Words cannot describe the beauty of this variety. Flowers are frosted white, spotted, clouded and bordered with deep pinkish crimson. A much superior variety to Roseum or Melpomene of the Speciosum type. Stem-rooting; plant 10 inches deep. Large bulbs, 45c each; \$1.20 for 3; \$4.50 for 12; \$35 per 100.

Speciosum album. This large, white Japanese Lily, with a greenish band running through each petal, is a splendid plant for the hardy border. It flowers late in the season and its clusters of bloom around the graceful stems and its fine green foliage set it off to wonderful advantage. Stem-rooting; plant 8 inches deep. Very large, strong bulbs, 45c each; \$1.20 for 3; \$4.50 for 12; \$35 per 100.
